Summary

Front-End Developer with 2 years building responsive, scalable web apps in React.js, Next.js, and TypeScript. Shipped production dashboards and project-management platforms, translating Figma designs into pixel-accurate, accessible (WCAG) UIs while collaborating in cross-functional teams.

Experience

Front-End Developer Oct 2025 – Present
Matrix Minds IT

- Build and maintain web applications using React.js, Next.js, and TypeScript.
- Develop responsive interfaces for desktop and mobile devices.
- Integrate REST APIs and dynamic frontend workflows.
- Collaborate with designers and backend developers in a cross-functional team environment.
- Improve maintainability through reusable components and structured architecture.

Front-End Developer Oct 2023 – Oct 2025
Oriented Coders

- Developed modern web applications using React.js and Next.js.
- Converted Figma designs into responsive and production-ready interfaces.
- Improved component structure and overall code quality.
- Worked within a team environment following professional development workflows.
- Tested applications across browsers and screen sizes to ensure compatibility.

Freelance Front-End Developer (Remote / Project-Based) Dec 2022 – Oct 2023

- Delivered responsive web applications for clients in remote collaboration environments.
- Communicated directly with clients to gather requirements and deliver production-ready solutions.
- Integrated REST APIs and optimized frontend performance.
- Leveraged AI tools to enhance development workflow and productivity.

Projects

Matrix Minds IT — Company Website

- Official corporate website developed to showcase IT services, featuring a mobile-first responsive design and an SEO-optimized structure.
- Focused on high performance and clean UI components for an optimal user experience.
- Built using React.js, Next.js, TypeScript, and Tailwind CSS.
- Live Demo: matrixmindsit.com

Kevta — Task & Board Management Platform

- GitHub-like project management platform with workspaces, boards, and item-based task organization.
- Created Kanban-style boards with draggable items, status columns, and structured task workflows.
- Implemented workspace management and responsive dashboards.
- Built using React.js, Next.js, TypeScript, and Tailwind CSS.
- Live Demo: kevta.matrixmindsit.com

Course Master — E-Learning Platform

- Role-based e-learning platform with dashboards for instructors and students.
- Implemented course management features including content organization, enrollment handling, and structured learning workflows.
- Developed responsive UI components and integrated REST APIs for dynamic data rendering.
- Built using Next.js, TypeScript, and Tailwind CSS.

Safety Zone — Fire Protection System & Dashboard

- Internal system and dashboard for a fire protection company to manage services and operations.
- Developed responsive admin interfaces for handling company data and workflows.
- Built using React.js, Next.js, and Tailwind CSS.

Technical Skills

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

UI & Styling: Tailwind CSS, Responsive Design, Mobile-First Design, Accessibility (WCAG), Figma to Code

Tools & Workflow: Git, GitHub, REST APIs, Vercel, AI Development Tools (Cursor, ChatGPT, Claude)

State Management:: Context API, React Hooks

Core Concepts: Component-Based Architecture, Reusable Components, API Integration, Clean Code, Performance Optimization

Education

Bachelor of Law Assiut University	2019 – 2023
---	-------------

Professional Development Career transition into Front-End Development through intensive project-based learning and hands-on experience with React.js, Next.js, and TypeScript.
